In Gleichien the method of keeping them out of gardens has been quite effective, such as running a ditch around the garden and turning the water on. The caterpillars go into the water and drown in thousands. ## BETTER "TODAY"

YESTERDAY'S fashions are not the fashions of today. Not only are fashions in dress constantly changing, but our daily habits and mode of living are subject to a steady process of evolution.

Conveniences have been invented and placed in use—and life is happier, easier for them. Every year, almost every day, sees some new thing of beauty, of use or for our pleasure, introduced. And they are invariably brought to our attention by advertising.

Advertising is the medium that is responsible, in large measure, for the rapid and constant improvement in our living conditions. Without advertising this old world would be dull and dreary place. With it, we progress; we learn about new things that we need—to shorten our tasks; to make ourselves more presentable; to brighten our leisure hours. Spend a few minutes with the advertising in this newspaper. Keep up to "today."
